### **DETAILED ACTION**

1. Claims 7 and 12-17 are pending.

#### ***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/9/03 has been entered.

#### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaspersen *et al.* {Journal of Label. comp. and Radiopharm., 27, No. 9, 1055 (1989)}. Kaspersen *et al.* teaches the multi-step synthesis of Org-3770 (mirtazapine) on

Art Unit: 1624

page 1058 (Fig.4). On page 1066, Kaspersen *et al.* teaches the synthesis of mirtazapine and the crystallization of the mirtazapine (compound **1c**) from the crude product using methanol/water solvent mixture to achieve colorless crystals. The only difference between applicant's mirtazapine and Kaspersen's Org-3770 is that Kaspersen's compound **1c** is <sup>13</sup>carbon labeled, but the instantly claimed product requires that the mirtazapine be unlabeled. The structure of Kaspersen's mirtazapine and the structure of applicants unlabeled mirtazapine are extremely closely related. One skilled in the art would not consider the labeled and unlabelled to be in any way significantly different one from the other. Since the labeled compound clearly suggests the unlabelled, the labeled hydrate would clearly suggest the unlabelled hydrate. This is particularly true since the labeled compound was prepared in order to study what the known unlabelled compound does in the body.
